## WEEE EU Directive

Pursuant to the WEEE EU Directive, electronic and electrical waste must not be disposed of with unsorted waste. Please contact your local recycling authority for disposal of this product.

## Customer Support

Customer technical support and services are provided by AudioCodes or by an authorized AudioCodes Service Partner. For more information on how to buy technical support for AudioCodes products and for contact information, please visit our Web site at [www.audiocodes.com/support](http://www.audiocodes.com/support).

## Abbreviations and Terminology

Each abbreviation, unless widely used, is spelled out in full when first used.

## Document Revision Record

LTRT	Description
39621	Initial document release for Version 7.2.

## Documentation Feedback

AudioCodes continually strives to produce high quality documentation. If you have any comments (suggestions or errors) regarding this document, please fill out the Documentation Feedback form on our Web site at <http://www.audiocodes.com/downloads>.

# 1 Introduction

This document describes the procedures for backing up and restoring the configuration settings of AudioCodes Mediant family of Media Gateways and Session Border Controllers (SBCs), hereafter referred to as *device*.

**Notes:**

- When you receive your device, make sure you backup all files to a folder on your PC.
- It is the customer's responsibility to save the backup INI files after every configuration change made on the device.

**This page is intentionally left blank.**

## 2 Backing up Configuration

You can back up the configuration through one of the following device management interfaces:

- Web interface (see Section 2.1 on page 9)
- CLI (see Section 2.2 on page 10)

**Note:** Make sure you have a backup copy of all auxiliary files (e.g., CPT and Dial Plan files) before you upload them to the device.

### 2.1 Backing up Configuration through Web Interface

The Web interface allows you to back up the device's configuration as an INI file or a CLI-based file (CLI script) in a folder on the PC client running the Web interface.

➤ **To back up the configuration:**

1. Open the Configuration File page:
  - **Toolbar:** From the **Actions** drop-down menu, choose **Configuration File**.
  - **Navigation tree:** **Setup** menu > **Administration** tab > **Maintenance** folder > **Configuration File**.

**Figure 2-1: Backing up Configuration through Web Interface**

Configuration File

SAVE THE INI FILE TO THE PC.	SAVE CLI SCRIPT FILE TO THE PC.
<input type="button" value="Save INI File"/>	<input type="button" value="Save CLI Script File"/>

2. Click one of the following buttons:
  - **Save INI File:** saves the configuration as an INI file.
  - **Save CLI Script File:** saves the configuration as a CLI-based file.

## 2.2 Backing up Configuration through CLI

The CLI allows you to back up the device's configuration as a CLI-based file (CLI command settings). You can back up the CLI-based file to any of the following locations:

- Remote server (HTTP, HTTPS or TFTP)
- USB stick

**Note:** The USB stick is only applicable to devices that provide USB support.

➤ **To back up the configuration:**

1. Establish a CLI serial connection with the device (e.g., Telnet).
2. Log in to the CLI.

```
Username: Admin
Password: < Password >
```

3. Access the Enable mode.

```
> enable
Password: < Enable mode password >
```

4. Enter the following command:

```
# copy cli-script to { < URL > | usb:///< File Name > }
```

Arguments	Description
URL	Backs up the configuration to a remote server defined by a URL. The URL can be one of the following: <ul style="list-style-type: none"> <li>• HTTP</li> <li>• HTTPS</li> <li>• TFTP</li> </ul>
usb:///< File Name>	Backs up the configuration to the USB stick connected to the device.

## 3 Restoring Configuration

You can restore the configuration through one of the following device management interfaces:

- Web interface (see Section 3.1 on page 11)
- CLI (see Section 3.2 on page 12)

**Warning:** When restoring an INI file, the device resets for the settings to take effect.

### 3.1 Restoring Configuration through Web Interface

The Web interface allows you to restore the device's configuration as an INI file or a CLI-based file (CLI script) from the folder on the PC client running the Web interface, by uploading an INI file or CLI-based file.

**Warning:**

- When restoring an INI file using the Configuration File page, parameters excluded from the INI file return to **default settings**. If you want to keep the device's current configuration settings and apply the settings specified in the INI file, load the file through the Auxiliary Files page.

➤ **To restore the configuration file:**

1. Open the Configuration File page:
  - **Toolbar:** From the **Actions** drop-down menu, choose **Configuration File**.
  - **Navigation tree:** **Setup** menu > **Administration** tab > **Maintenance** folder > **Configuration File**.

**Figure 3-1: Loading INI File using Configuration File Page**

LOAD THE INI FILE TO THE DEVICE.		LOAD CLI SCRIPT FILE TO THE DEVICE.	
Choose File	No file chosen	Choose File	No fil...hosen
Load INI File		Load CLI Script File	

The device will perform a reset after loading the INI file.

2. Click one of the following buttons:
  - **Load INI File:** restores the configuration from the INI file.
  - **Load CLI Script File:** restores the configuration from the CLI-based file.

## 3.2 Restoring Configuration through CLI

The CLI allows you to restore the device's configuration as a CLI-based file (CLI command settings). You can restore the CLI-based file from any of the following locations:

- Remote server (HTTP, HTTPS or TFTP)
- USB stick

**Note:** The USB stick is only applicable to devices that provide USB support.

➤ **To restore the configuration:**

1. Establish a CLI serial connection with the device (e.g., Telnet).
2. Log in to the CLI.

```
Username: Admin
Password: < Password >
```

3. Access the Enable mode.

```
> enable
Password: < Enable mode password >
```

4. Enter the following command:

```
# copy cli-script from { < URL > | usb:///< File Name > }
```

Arguments	Description
URL	Restores the configuration to a remote server defined by a URL. The URL can be one of the following: <ul style="list-style-type: none"> <li>• HTTP</li> <li>• HTTPS</li> <li>• TFTP</li> </ul>
usb:///< File Name>	Restores the configuration to the USB stick connected to the device.
